DeltaSol[®] SLT

Freely configurable compact-class controller

Numerous pre-programmed optional functions!

The DeltaSol[®] SLT effortlessly controls even complex systems. 27 pre-configured system layouts with numerous pre-programmed optional functions such as thermal disinfection or zone loading enable adaptation to the individual system requirements.

The operation via 2 main buttons and 1 adjustment dial, the Lightwheel[®], still follows the well-known operating concept. The multicoloured LED, integrated in the Lightwheel[®], offers many possibilites to signal different system states.

The microSD card slot, the mini USB connection and the 2 microbuttons for quick access to the manual mode and the holiday function are located underneath the slidable housing cover, the **SL**ider.
